PRODUCT INFORMATION

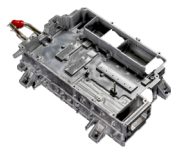

Motor HSG

A part that fixes the stator and supports the bearing part of the rotor in the motor body, preventing harmful substances such as foreign matter, dust, and water from entering the motor, while extending the life of the motor and shortening assembly time. .A part that fixes the stator and supports the bearing part of the rotor in the motor body, preventing harmful substances such as foreign matter, dust, and water from entering the motor, while extending the life of the motor and shortening assembly time. .

Cross Member

It is a horizontal structure installed to secure overall rigidity and stability by connecting the left and right structures of the vehicle.

ICCU HSG

Components that protect and seal the integrated charging system within the vehicle

Cylinder Head

The piston, which receives high heat and great force as the mixture combusts and expands, acts as a guide for reciprocating motion and cools the cylinder appropriately to firmly support the crankshaft.

Cylinder Block

It forms a combustion space so that the high-pressure gas and air mixture can ignite and burn accurately. Additionally, the cylinder head functions as a seal to maintain pressure generated within the cylinder and prevent leakage to the outside.

COMPANY OVERVIEW

Dongseo Machine & Tools is the Alluminum Die-Casting manufacturer which produces powertrain, EV components and Body/Chassis parts. Our major client is 'Hyundai/KIA Groups', 'General Motors'. We are running 4 domestic factory and 3 Subsidiary factories located in Indonesia and china. Our company's agenda for next decade is "to diversify the clients and locations". Our company is planning to build the factory in Slovakia and Mexico for furthering our business.

Competitiveness & Sales Points

Dongseo Machine & Tools has an advantage at Die-Casting.
We have various method (HPDC / HVHPDC / LPDC / GDC / GPTC/ Giga-Casting)
