SALES INFORMATION

Major sales region (%)

Poland (40%)
 Brazil (30%)
 Mexico (20%)
 Korea (10%)

Major customer (%)

ZF (70%)
 Nexteer (10%)
 Mando (10%)
 Bosch (10%)

Major products (%)

Intermediate shaft (70%)
 Input/output shaft (20%)
 Rack tube (10%)

PRODUCT INFORMATION

Steering Intermediate Shaft

It is a ball slider type part applicable to the electronic steering system with a non-welding ball slider structure for high torque transmission and high rigidity. It has robustness of breakage. Taelim has our own design capability.

Steering Input/output Shaft

It is precision shafts for electronic power steering, and is responsible for the axis of the rotation center of the column part. Minimize loss of function during assembly and operation by precise tolerance and clearance management.

Precision Pipe

Small diameter with heavy wall-thickness tube manufacturing. Best alternative for Round-bar and Seamless tubes. OD Range 19.1~101.6mm with Max. WT 13.0mm. Customizing products available of various types of steel grades, applications.

COMPANY OVERVIEW

Competitiveness & Sales Points

Taelim is a manufacturer that designs/produces automotive steering system parts specializing in mechanical tube forming and welding, precision machining and assembly. Taelim has been exporting to global automotive system companies for over 30 years. Based on production know-how and related technology for vehicle steering system parts, Taelim has succeeded in developing a world-class Intermediate shaft, and is also currently expanding it's position in the ERW pipe market.

Intermediate Shaft
 Establishment of a one-stop engineering system that allows from design to manufacturing and verification according to in-house design and development
 Input/Output shaft
 Rolled or forged serration according to geometrical or commercial requirement.
 Precise hardness control via heat treatment and raw material control.
 Precision Pipe
 Material costs and weight can be reduced by 20-30% by changing from round bars to our ERW steel pipes.
