PRODUCT INFORMATION

MLCC
(Multilayer Ceramic Capacitors)

제품 사진

제품명

Our company manufactures multilayer ceramic capacitors (MLCCs), which are essential components in electronic devices, aiding semiconductor performance and refining power. Capacitors have two primary roles: firstly, they eliminate voltage fluctuations, known as "noise," ensuring semiconductor devices receive the correct rated voltage. Secondly, they act like batteries, swiftly supplying power as needed for real-time semiconductor operation. MLCCs are the most efficient and compact components for power management among capacitors. AVATEC supplies high-quality MLCCs with excellent DC-BIAS characteristics and reliability to automotive, industrial, medical, and IT sectors. Our products meet AEC-Q200 specifications, especially crucial for automotive MLCCs. Despite being a newcomer, we offer quality and pricing comparable to global top 5 companies. We mass-produce MLCCs used in power optimizers for leading solar energy firm. Through ultrasonic non-destructive testing on MLCC internals, we ensure no defective MLCCs reach our customers, and we're proud to have had no quality complaints since starting mass production.

COMPANY OVERVIEW

Competitiveness & Sales Points

The largest shareholder

Jaе Gon Wi

CEO

Myung Seop Park

Date of establishment

2000.08.18

Capital

KRW 8.1 billion

Status of business establishments

the site of the Daegu headquarters : 13,223.14㎡ Factory : 12,561.96㎡ Dormitory : 1,322.31㎡

the land of a factory in Gumi : 26,446.28㎡ Factory : 3,0413.22㎡

the site of the Ochang factory : 14,919㎡ Factory : 2,632.23㎡

Address

Daegu Headquarters (Woo) 42715 Dalseo-daero 85-gil, Dalseo-gu, Daegu, 100

Gumi Factory (Woo) 39165, Tbeon-gil, Shandong-myeon, Gumi-si, Gyeongsangbuk-do, 69-21, Korea

Ochang Factory (Woo) 28165 Ochanggiwa 1-gil, Ochang-eup, Cheongwon-gu, Cheongju-si, Chungcheongbuk-do, 49

1. Industrial applications: The company's MLCCs are used in the automotive, medical device, general industrial and IT sectors, especially supplying high-quality products that meet the required AEC-Q200 specifications for automotive components.

2. Market competitiveness : Abatech is competitive in quality and price compared to global majors, and supplies MLCCs in large quantities to the world's top solar companies.

3. Quality control : The company strictly controls the quality of MLCCs through ultrasonic non-destructive testing, and has not received a single quality complaint since mass production.
